Release of Detained Infant Formula Powder Milk Shipment to Italy

Report Categories:

Export Accomplishments - Other

Approved By:

James Dever

Prepared By:

Dana Biasetti

Report Highlights:

Italian veterinary authorities at Rome International Fiumicino airport detained a shipment of U.S. infant formula powder milk in March 2011. FAS/Rome immediately contacted the importer, the exporter, USDA APHIS's EU representative, and local veterinary authorities to resolve the problem concerning a missing export certificate. Following this intervention, Italian authorities released the shipment, valued at approximately \$50,000.
